

ARE YOU LOSING CUSTOMERS

BECAUSE YOUR GREASE-PROOF PAPER CAN'T HANDLE IT?

Samosas, kachoris, jalebis, chole bhature, parathas, fries, wraps - foods that are desi, hot, and full of flavour, but also unforgiving when the paper can't handle the oil. A stained or leaking wrap or a soggy base doesn't just affect the food, it shapes how your brand is remembered. Pakka's **GREASE-PROOF PAPER** is made for these everyday realities - keeping every serve clean, every wrap intact, and every delivery exactly the way you intended.

Burger

Freshness that lasts
up to 40 minutes

Sandwich

Mess-free holding
for up to 4 hours

French Fries

Crunch retained for
up to 30 minutes

Pizza

Grease control for
up to 35 minutes

Numbers are one thing. Turn the kit over.
Run the test. That's where the proof actually lives.

WE'VE SPENT 40 YEARS

PERFECTING PAPER – THIS IS WHERE IT SHOWS.

We've always believed that paper should do justice to what it carries. So, when food businesses needed a better alternative to coated, inconsistent wraps, we didn't just step in – we stepped up. We went back to the material, re-engineered it, and built a grease-proof range that performs without shortcuts. No extra coatings, no compromises – just high-performance paper designed for the way food is made and served today.

Because your food carries your reputation, and your packaging should protect it.
